

The Rehabilitation Research and Training Center on Aging with a  
Disability Presents:

The State of the Science Conference on Aging with a Disability:  
Implications for Practice, Research and Policy

September 7-8, 2006  
Portland, Oregon Marriott Downtown Waterfront Hotel

\$79.00 for 2-day conference  
Includes CEUs

**Conference Description:**

This 2-day conference describes the most important medical, functional and psychosocial issues facing people who are living long-term and aging with a disability. Approaches for preventing, assessing and treating these problems will be presented.

**Conference Objectives:**

Attendees will be able to:

- i. Identify common medical, functional and psychosocial issues faced by people who are living long-term with a disability.
- ii. Describe strategies for prevention, assessment and treatment and apply them as appropriate to their patient/client population.

Topics to be covered in this conference will include:

- Medical/Healthcare Issues
- Policy Issues
- Shoulder Pain in SCI
- Psychosocial Issues
- Planning and Interpreting Aging with a Disability Research
- Functional and Musculoskeletal Issues
